Using the RoboForm Start Page

Take a quick tour of the web page version of RoboForm. It has all the same functionality as the Editor, just a different view!

New User Training

Watch this video first to learn how to use all the features in RoboForm.

Using the RoboForm Toolbar in Chrome

Add RoboForm's handy Toolbar to Chrome for quick access to all the different features.

RoboForm Password Generator

The password generator will create passwords based on the criteria you set. These passwords can be copied to your clipboard or inserted to an open password field.

Saving a Bookmark

For ease of managing all of your websites, with or without logins, RoboForm allows you to save a Bookmark. Doing so provides you a central location to manage all websites across all browsers.

Creating a Batch Login

Batch Login allows you to log into multiple sites with just 2 mouse clicks. If you log into the same sites every morning, put them in a Batch Login so you don't have to open them each individually!

Editing a Login

When credentials change, it can be disruptive to your day. RoboForm is flexible so you can make changes using the Editor when you have time as well as on the fly avoiding disruption to your workflow.

Using the RoboForm Form Filler

If you fill out the same form over and over, you can create a profile that will populate the fields in that form for you.

Using RoboForm Safenotes

Safenotes is a place to store additional information such as a short step by step list of processes or your locker combination.
